Are You at Risk?

Alzheimer's Risk Factors Suggesting Preventative use of LUMA TC

- **Age 40 or above.**
- **Genetic Factors**-APOE-4 and/or MTHFR markers. To find out your risk, call DVD 985-629-5742 for easy genetic testing.
- **Family History**-memory loss, dementia, Alzheimer's or other brain degenerative diseases or issues.
- **Mental State**-Anxiety, Depression, Bi-Polar Depression, Loneliness, Seclusion or Fear of Aging.
- **Diabetes and/or Cardiovascular Disease.**
- **Previous Head Trauma or Stroke**.
- **Lack of Exercise, Sedentary Lifestyle or Poor Diet**.
- **Moderate to Heavy Alcohol or Tobacco use**.
- **Toxic Chemical**, Pollution**, Heavy Metal or Pesticide Exposure**.

"The disease processes of Alzheimer's occur up to 30 years before the clinical diagnosis of the disease. Brain plaques and tangles have been shown to occur early in patients with known risk factors. These findings raise the possibility of preventing clinical symptoms."

Alzheimer's Disease Genetic Risk Factor APOE-4 Also Affects Normal Brain Function, Georgetown U., Current Alzheimer Research, 2016
